	and collinears, required marks access		
Changes:			
	9/94	GraphObjectList::GraphObjectList() {	tList() {
	so that it will creates the gedatatransfile.lock file before		
	reading from the gedatatransfile.txt file and remove the	_root_op_name	= NOLL;
	gedatatransfile.lock file when the reading is completed.	_parent_op_name	= NOLL;
		_current_op_name	
	codes are also added to the store_data() routine in the	_head_input_list	= MULL;
	ge_interface.c file so that it will only write to	_head_output_list	= NULL;
	gedatatransfile.txt file if the gedatatransfile.lock	_cur_op_spec	
	does not exist in current directory.	_head_ptr	= NULL;
		_timer_list	= NULL;
Reengi	Reengineering:	_graph_informal_desc	= NULL;
Doug L	Doug Lange added build_from_sde member function on 9/10/96	_avail_impl_langs	= NULL;
		_global_types	= NULL;
History:	ıy:	display ptr	= NULL;
01	96/09/29 Ken Moeller	graphics_context	= NULL;
}	Read in streams as well as operators from sde.	_erase_context	= NULL;
		_dotted_context	= NULL;
62	96/10/04 Ken Moeller	_drawing_area_pixmap	= NULL;
	Removed un-needed routines to read and write to disk.	_draw_window	# 0;
•		_error_tgt	= NULL;
9	95/10/05 hem mostrer Removed un-needed routines to read and write to property.	_width = 0;	
		_height = 0;	
94	96/10/06 Ken Moeller	_psdl_modified = false;	

Added streams to objects written out in write_to_sde.
